SUMMARY

As a student of software engineering, I possess a strong command of HTML and CSS, along with a basic understanding of JavaScript and React. I am eager to apply my skills in an internship position, where I can gain hands-on experience in a real-time work environment. With a passion for learning, I am a quick learner and always looking to enhance my skills to contribute to the success of the organization.

COVER LETTER

DEAR, HR MANAGER,

I am excited to apply for the web development internship position at your company. As a fresh web developer with a strong command of frontend development, I am eager to gain practical experience and enhance my skills in a professional environment.

I have a solid foundation in HTML, CSS, JavaScript, and related frontend frameworks, and have completed various personal projects to strengthen my skills, although I know that these are basics but I'm doing my best to boost up the level of the projects and I'll do my best to provide for the company. However, I understand the importance of real-world experience, and I believe your company would be the ideal place for me to gain such experience.

I am especially drawn to your company's reputation for innovation and dedication to delivering cutting-edge solutions to clients. I believe that working with your team would provide me with a unique opportunity to learn from seasoned professionals in the field and contribute to meaningful projects that positively impact users.

Thank you for considering my application. I look forward to discussing my qualifications further in an interview.

Sincerely,

Abdullah Naseer
